

STEVEN LEE – Introduction

Steven brings over 20 years in information technology and 16 years driving sustainability initiatives, helping organizations across Malaysia adopt effective, practical sustainable practices.

He specializes in Green Project Management, ESG and GHG emissions reporting, including Life Cycle Assessment for carbon footprint analysis, and has supported numerous public-listed companies and SMEs with their sustainability and carbon reporting, and certification.

He holds a Master's in Sustainable Development Management from Sunway University under the Jeffrey Sachs Center on Sustainable Development, along with professional certifications including Associate Certified Sustainability Assurance Practitioner, ISO 14064-1 & 14064-2 GHG Accounting Lead Verifier, ISO 14067 Carbon Footprint Accounting & Sustainability Auditor, and ISO 20121 Lead Auditor.

He is a HRD Corp-certified trainer, a Graduate Technologist recognized by the Malaysia Board of Technologists, and a Green Building Consultant for Green Building Index and GreenRE, with notable projects including TRX Exchange 106, Equatorial Plaza, and Penang Second Bridge.

He currently serves as President of ESG Malaysia, where he leads efforts to advance ESG awareness and adoption nationwide. Steven is committed to empowering organizations to embed ESG principles into their operations, ensuring that sustainability is not just a practice, but a lasting legacy.
