ABOUT

The Conference and Exhibition on Occupational Safety and Health (COSH) is an annual flagship event organised by the National Institute of Occupational Safety and Health (NIOSH), an agency under the Ministry of Human Resources (KESUMA). COSH is dedicated to address current issues, emerging trends and key challenges in Occupational Safety and Health (OSH).

In 2026, COSH marks its 26th edition, reflecting its long-standing legacy and the strong support it has consistently received since its inception in 1998. Over the years, the conference has established itself as a premier platform for OSH professionals in Malaysia, facilitating the exchange of knowledge, best practices and innovations to keep pace with the evolving workplace landscape.

COSH 2026 will bring together regulators, industry practitioners, subject matter experts, researchers and solution providers under a shared vision to advance safer and healthier workplaces for all.

Established in 1992, NIOSH is a government institution committed to enhance OSH standards across industries. Its core functions include training, information dissemination, research and development (R&D) and consultancy services. As the national centre of excellence for OSH, NIOSH continues to attract professionals, industry stakeholders and students to actively engage in its programmes and initiatives.

This initiative is also in line with the aspirations of Malaysia MADANI, which emphasises the well-being, sustainability and inclusivity of the workforce, reinforcing the importance of safe and healthy working environments as a foundation for national development.

In line with this commitment, NIOSH will organise COSH 2026 from 14 to 15 September 2026 at the Malaysia International Trade and Exhibition Centre (MITEC), Kuala Lumpur.

COSH 2026 THEME

WELLBEING AT WORK

The theme “Wellbeing at Work” reflects a progressive and holistic approach to Occupational Safety and Health (OSH) that aligns with the Ministry of Human Resources’ (KESUMA) commitment to strengthen worker protection, improve labour standards and advance decent, productive and sustainable employment in Malaysia.

Focusing on the theme, the 26th Conference and Exhibition on OSH (COSH 2026) will serve as a strategic national platform to advance dialogue on strengthening compliance with OSH legislation, embedding wellbeing into governance frameworks and enhancing performance through proactive risk management.

Organised by the National Institute of Occupational Safety and Health (NIOSH), COSH 2026 will highlight how organisations can move beyond reactive safety measures towards comprehensive systems that protect both physical and mental health. It is also in line with the World OSH Day 2026 theme, which recognises that workplace wellbeing extends beyond physical safety to include mental health, psychosocial risk management, supportive leadership and responsible work design.

COSH 2026 will also position workplace wellbeing as a measurable driver of Environmental, Social and Governance (ESG) performance, particularly strengthening the Social and Governance pillars through worker protection, ethical leadership, transparency, accountability and proactive risk management.

“Wellbeing at Work” also supports the MADANI Government and KESUMA’s broader agenda of enhancing compliance, strengthening governance and ensuring that employers uphold their statutory obligations under OSH legislation. It reinforces the importance of proactive risk management, transparent systems and preventive culture in creating safe, healthy and dignified working environments.

Through the exhibition, NIOSH and exhibitors will showcase practical approaches to assist employers and employees in understanding legal obligations, improving OSH management systems and implementing targeted workplace interventions. NIOSH’s research and development team will also contribute evidence-based insights and tools to address emerging psychosocial risks, evolving workplace challenges and data-informed wellbeing improvement strategies.

Aligned with the Malaysia MADANI’s vision of shared responsibility and sustainable prosperity, COSH 2026 will champion wellbeing at work as the foundation of a strong and future-ready nation. By uniting policymakers, industry leaders and OSH professionals, the conference will advance meaningful action that protects people, strengthens governance and secures a healthier, more resilient workforce for generations to come.

CALL FOR PAPER

Be part of the conversation shaping the future of workplace wellbeing.

Following the success of previous editions, NIOSH Malaysia proudly invites researchers, practitioners, policymakers and industry leaders to participate in the 26th Conference and Exhibition on Occupational Safety and Health (COSH 2026). This premier OSH conference provides a dynamic platform to share research findings, innovative practices and real-world solutions that are shaping safer and healthier workplaces.

COSH 2026 focuses on the holistic wellbeing of workers, integrating safety, health and psychosocial dimensions to build resilient, productive and sustainable workplaces. The key topics are as follows:

Workplace Safety & Injury Prevention:

- Embedding safety culture and leadership
- Effective communication of safety message & management system approach

Industrial Hygiene & Exposure Control:

- Innovations in monitoring and controlling workplace hazards
- Integrating hygiene practices into sustainability agendas

Occupational Health (Physical Wellbeing):

- Promoting physical health through ergonomics and workplace design
- Enhancing health surveillance and preventive programs

Psychosocial Wellbeing & Risk Management:

- Tackling stress, burnout, and mental health challenges
- Building resilience and supportive workplace cultures

Submissions addressing emerging and strategic approaches are also encouraged, including:

- Linking occupational safety and health with ESG and global sustainability agendas
- Leveraging digital tools, AI, and automation in OSH practices
- Flexible work arrangements and the future of work
- Advancing workplace wellbeing through cross-sector collaboration and effective communication
